Bayesian Statistics and Data Analysis

Course information

Måns Magnusson
Department of Statistics, Uppsala University

UPPSALA
UNIVERSITET

Who am I?

- Course information
- Assignments
- Mini-project
- Practicalities
- Examination
- Course improvements

1. Associate professor in Statistics
2. Teaching: Machine Learning and Bayesian Statistics
3. Research: Machine Learning and Bayesian Statistics
 - 3.1 Bayesian Statistics and computational statistics
 - 3.2 Data-centric machine learning
 - 3.3 Statistical inference from textual data
 - 3.4 Applications: Law, sociology, political science, and medicine

Section 1

Course information

UPPSALA
UNIVERSITET

Course information

The aims of this course are that, after this course you should:

- Course information
- Assignments
- Mini-project
- Practicalities
- Examination
- Course improvements

UPPSALA
UNIVERSITET

Course information

The aims of this course are that, after this course you should:

1. have knowledge in basic concepts, philosophy, and perspectives in Bayesian Statistics,
2. derive posterior distributions in simple situations,
3. derive and use predictive distributions,
4. identify and formulate Bayesian probabilistic models for analysis and predictions,
5. estimate models using contemporary computer-based methods for posterior approximations,
6. understand and use basic principles for decisions under uncertainty,
7. have knowledge about and be able to use Bayesian methods for model comparisons,
8. be able to critically evaluate Bayesian methods,
9. report, orally and in writing, a Bayesian statistical analysis

- Course information

- Mini-project
- Practicalities
- Examination
- Course improvements

UPPSALA
UNIVERSITET

Pre-requisites

- Course information
- Assignments
- Mini-project
- Practicalities
- Examination
- Course improvements

- Basic probability theory
 - probability, probability density, distribution
 - sum, product rule, and Bayes' rule
 - expectation, mean, variance, median

UPPSALA
UNIVERSITET

Pre-requisites

- Course information
- Assignments
- Mini-project
- Practicalities
- Examination
- Course improvements

- Basic probability theory
 - probability, probability density, distribution
 - sum, product rule, and Bayes' rule
 - expectation, mean, variance, median
- Basic linear algebra and calculus

UPPSALA
UNIVERSITET

Pre-requisites

 - Online video material and reading assignments (approx. 2-4h, 50-90 pages a week)
 - Lecture(s): present overall theory and content (overview)
 - Assignment(s): Computational and theoretical individual work. (approx. 12-16h). **Deadline Sundays 23.59.**
Start monday morning every week!
- Recommended workflow for each week
 - Do the reading assignments
 - Watch the videos (although, optional)
 - Do self-study exercises
 - Start with the assignment
 - Attend lecture (bring questions!)
 - Attend Zoom datalabs (bring questions! Helps with debugging Stan code)
 - Submit the assignment
 - Review the oral exam questions and practice explaining answers in groups

Stan

- Stan is a probabilistic programming framework (PPF) and ecosystem
- 40+ developers, 100+ contributors, 100K+ users
- R, Python, Julia, Scala, Stata, Matlab, command line interfaces
- More than 120 R packages using Stan
- Many packages to support diagnostics and workflow
- Can be used for frequentist inference as well
- Alternative PPF exists, Turing (Julia), Pyro (PyTorch), etc.

1. To pass (G): All labs, oral exams, mini-project, and project review need to be passed
2. To pass with distinction (VG): 7/10 VG points
3. If everything is correct in an assignment ($\geq 90\%$), 1 VG point is awarded *on the first submission deadline*.
4. Assignment VG points require passing the oral exam for that assignment.

Examination

1. To pass (G): All labs, oral exams, mini-project, and project review need to be passed
2. To pass with distinction (VG): 7/10 VG points
3. If everything is correct in an assignment ($\geq 90\%$), 1 VG point is awarded *on the first submission deadline*.
4. Assignment VG points require passing the oral exam for that assignment.
5. The mini-project is worth 2 VG-points (if it is passed with distinction).
6. Ph.D. students: I suggest you get VG to pass the course. Make the project a potential paper.
7. Reassessment of grades (supply form to course admin)
8. Failing the course: You will need to redo all assignments and mini-project next year.
9. LLMs may be used for learning, explanations, and feedback, but not to produce submitted solutions.
